 - 3.3 Subgroup report: RDF/Role
 - 3.4 Iteration 1 report
- 4 Agenda

Present

Markus, Per, Ole, Marisa, Boris, Sam (scribe)

Regrets: Matt

Action Item Summary

Completed Action Items

- @Boris/Marisa - RDF/Role summary report

Action Items carried over

- @Kenny to set up a concall with Markus, Kenny and Gregory Rusmeda about the possibilities for Gregory to join the group. Completion ASAP.
- @Markus to create a wiki page that discusses the rationale behind the use of xhtml:role in non-technical terms. Boris is co-author. Completion ASAP.
- @Markus to follow up the contact with the xhtml2 WG.
- @Stephen to create a wiki page describing the RNIB book and magazine DTDs. This action item needs to be completed by 31 October 2008.
- @Kenny - Is NewsML modular? How is their schema built? Need more info on the wiki.
- @Markus/Per - discuss pros/cons of the XHTML2 modularization framework in separate wiki page

New Action Items

- @Markus add root@version RDF URI to leisure example doc
- @Markus iteration report draft by wednesday

Minutes

Briefings

The invitation to the IFLA LBS cataloguing steering committee has gone out. Matt has offered to lead the group. The target deliverable is a first draft of a metadata set for ZedAI by February 2009.

W3C TPAC has concluded. The XHTML2 WG meeting minutes indicate that they are targeting a LC by January 2009. This is good news for us, but Kennys and Markus action items to talk further to WG members remain.

Action Item review

NewsML and the Periodicals Profile

Kenny noted that he had sent a clarification email on Vision Australias use of NewsML. The action item to describe NewsML schemas and modularization options remain. Since the NewsML schema seems to be monolithic and is relatively weak in terms of describing actual content, it appears that a more effective option for us when composing the periodicals profile may be to create our own module for periodicals, and use the RDF/Role framework to create formal mappings "back" to the NewsML (and NITF) grammars.

It was concluded that a theme for iteration 2 should be to start working concretely on the periodicals profile.

Subgroup report: RDF/Role

Marisa and Boris presented their RDF/Role report, available as a separate document at [ZedAI_Roles_Report20081026](http://www.daisy.org/zw/ZedAI_Roles_Report20081026) (http://www.daisy.org/zw/ZedAI_Roles_Report20081026) . Notes from the telcon specific to this report are available at the end of the document.

In this report, major focus is on behavioral descriptions, as opposed to atomic semantics/inheritance. A theme for iteration 2 is to deal with semantics/inheritance explicitly (and this can be done through the NewsML/NITF mappings).

Iteration 1 report

Due to lack of telcon time, it was decided that Markus writes a draft report and gets it to the group by wednesday this week.

The WG concluded that the general feeling is that we are on the right track, and can safely recommend to continue down this path for iteration 2.

Agenda

- Scribe
- Status report, metadata subWG (IFLA)
- Information on W3C TPAC
- Action item review (with emphasis on the last item, RDF/Role integration)
 - @Kenny to set up a concall with Markus, Kenny and Gregory Rusmeda about the possibilities for Gregory to join the group. Completion ASAP.
 - @Markus to create a wiki page that discusses the rationale behind the use of xhtml:role in non-technical terms. Boris is co-author. Completion ASAP.
 - @Markus to follow up the contact with the xhtml2 WG.
 - @Markus to come up with an iteration report after the first iteration ending October 31 2008.
 - @Stephen to create a wiki page describing the RNIB book and magazine DTDs. This action item needs to be completed by 31 October 2008.
 - @Kenny - Is NewsML modular? How is their schema built? Need more info on the wiki.
 - @Markus/Per - discuss pros/cons of the XHTML2 modularization framework
 - @Boris/Marisa - what are the next steps for the RDF work
 - **@Boris/Marisa - RDF/Role summary report (need to integrate into doc samples this week)**
- Iteration report - content outline
- AOB
