- 2 Present
- 3 Regrets
- 4 Action Items
- 5 Agenda

Scribe

James

Present

Markus, Per, Boris, Josh, Matt, Sam, Stephen, Ole, Kate

Regrets

Kenny

Action Items

- Markus to send list of RelaxNG-compatible tools to e-mail list
- Everyone to read through XForms/QTI document for next call
- Markus to add spec prose on cascading level for inline styles: "For the purposes of the CSS cascade, these values are considered author-level"
- Markus to create wiki page devoted to level issue
- Markus to invite people for profile testing
- Markus to ask the DAISY list about how newspapers/periodicals markup is currently being done.

Agenda

- Risk analysis - discussion around W3C dependencies and a potential fallback plan
 - (See iteration report for details)
 - Options:
 - Wait and see what happens
 - Reduce our dependence on XHTML2
 - Make our own versions of XHTML2 core modules
 - Make our own version of XHTML modularization framework (this would cause delay)
- Planning of subWG work for this iteration (see Iteration 3 deliverables and Iteration 2 Issue Log)
 - Book profile testing, sample generation (Sam, Kate) (see existing Origin of Species sample (<http://code.google.com/p/zednext/source/browse/#svn/trunk/test/z3986a/book/valid>))
 - Agreed: @Sam and @Kate to continue work on examples (front/back matter and sample chapter or two)
 - @Markus: Find out about using World Cultures and Geography book
 - MODS inclusion mechanism (Matt, Markus), and subsequently MODS validation. Depends in part on input from testers.
 - James: Could we use MODS XML in head for cataloging data, then something else for "peppered" data within document?
 - Markus: Maybe use Dublin Core for pepper?
 - @Matt and @Markus: Try this out to see how it looks
 - Interactivity feature (Dennis, Josh)
 - @All: Read through XForms/QTI document and make decision on which to use
 - MathML feature review and finalization (Markus, Dennis)
 - @Dennis: Close out action items from tracker
 - Answer questions about mathematic pragmatic schema modules: include or not?
 - ID-ness in MathML: @xml:id or @id? Can host grammar inject @xml:id?
 - RDF vocab granularity, integration with RDF/a schema enums (currently only integrates with @role)
 - @Marisa: Do what needs doing
 - Newsfeeds profile testing, sample generation (Kennys subWG)
 - @Ole: produce samples and provide feedback (to be discussed on the subWG call)
 - @Kenny: Check with Australian publishers for content
 - Periodicals Profile (Kennys subWG)
 - @subWG: Revive periodicals work
 - Complete Primer document (@James)
 - Schema documentation refinements (@Per)
- What tools are available to work with current profile schemas?
 - @Markus: Send list of RelaxNG-compatible tools to e-mail list
