- 2 Present
- 3 Regrets
- 4 Previous Action Items
- 5 Agenda/Minutes
 - 5.1 Changes on trunk
 - 5.2 Iteration status
 - 5.3 Previous action items
 - 5.4 XForms/QTI way forward
- 6 Previous Minutes

Scribe

Markus

Present

Ole, Dennis, Josh, Per, Boris, Markus, Sam, Matt, James, Marisa

Regrets

Kenny

Previous Action Items

- Dennis/Josh contact QTI and ask about replacing the HTML with host language text content set.
- Markus to add spec prose on cascading level for inline styles: "For the purposes of the CSS cascade, these values are considered author-level"
- Markus to create wiki page devoted to level issue

- Markus to invite people for profile testing
- Markus to ask the DAISY list about how newspapers/periodicals markup is currently being done.

Agenda/Minutes

Changes on trunk

- now renders output directly in web-enabled structure
- includes indices, catalogs
- single tasks can be run ("build.bat build-ai-spec" for example)
- vocab integration not done

Iteration status

- end date forwarded to 29th (and zeddist first call is held 19th)
- building a burndown chart for the iteration at ZedAI_Iteration3_TaskLog

Previous action items

James: spec is now being refactored into chameleon mode re namespaces

Dennis: I have a new contact in QTI, but havent had the time to follow up

XForms/QTI way forward

Suggestion from emailing list:

```
1) to (as discussed on the con) clarify clearly that the scope of this feature
is limited to representing more common print book phenomena of this kind. A
complete interactive testing scenario is either out of scope (since QTI already
does this) or matter for a dedicated profile.
2) to produce an XForms+Vocab prototype of the feature, for evaluation and testing
3) to again make it clear that this is only a prototype, and that we, given that
some obstacles in QTIs design are resolved, intend to produce a parallel prototype
using QTI semantics, for comparison with the XForms version.
```

Group decides to follow this proposal. @markus set up telcon with Josh to get cracking on subset schema authoring.
