ZedAI telcon 20090608

From zedwiki

**Note:** this meeting will be held at 1300h UTC. Find the meeting time in your geographical location (http://www.timeanddate.com/worldclock/fixedtime.html?month=6&day=08&year=2009&hour=13&min=0&sec=0&p1=0).

**Contents**

1. Present
2. Regrets
3. Previous Telcon
4. Action Items
   4.1 New
   4.2 Brought along
5. Agenda/Minutes
   5.1 Iteration kick-off
      5.1.1 Core model defined as schema
      5.1.2 Periodicals
   5.2 Generic document profile
   5.3 Math feature
   5.4 Content Selection Feature
   5.5 Spec and primer documents
   5.6 Profile Composition Guidelines
   5.7 Issue tracker entries
      5.7.1 MODS issues
      5.7.2 Annotation, object et al
   5.8 Schemadoc markup examples
   5.9 Forms feature

**Present**

Markus (scribe), James, Ole, Josh, Sam, Per, Boris, Kenny, Marisa

**Regrets**

**Previous Telcon**
Action Items

New

- markus bring forward missing lingering action items from previous telcons
- markus add all math issues clearly to tracker
- all: reality check at next week telecon: revisit iteration end date vs deliverables.

[see further below]

Brought along

- Dennis/Josh contact QTI and ask about replacing the HTML with host language text content set.
- Markus to add spec prose on cascading level for inline styles: "For the purposes of the CSS cascade, these values are considered author-level"
- Markus to create wiki page devoted to level issue

Agenda/Minutes

Iteration kick-off

- Review of Iteration Deliverables and our issue tracker buddies (http://code.google.com/p/zednext/issues/list)
- Fill in any missing items
- First steps for subgroups

A big part of the Iteration Deliverables list are about upping profile and features one version notch.

Notes on other items, identified to be the first we address in this iteration:

Core model defined as schema

@markus (schema), then @james (spec)

Periodicals

@kenny with subgroup. Target is to get version 0.1 out by end this iteration.

Kenny: do we include science journals?

Markus: yes, science is covered through the feature construct.
Kenny: this is mostly about extra semantics at the document level. We also have the concepts identification at Wiki.

Kenny: note on Feeds profile - would benefit from examples from all usage contexts.

Ole: should be a combination of RD prose and examples.

**Generic document profile**

@sam work on some sample docs

**Math feature**

@dennis owns outstanding MathML issues.

@markus add all math issues clearly to tracker

**Content Selection Feature**

@Per help with content selection feature function set definition.

**Spec and primer documents**

@james working on spec TODO list

**Profile Composition Guidelines**

Markus: propose that this should be: Profile Adaption Guidelines and include a section on how to adapt an existing profile using vocabs, role and rdf/a.

However, this is not a high prio in this iteration.

**Issue tracker entries**

**MODS issues**

@Matt to look at issues 47-49

**Annotation, object et al**

@Boris owns issue 39; propose a solution.

**Schemadoc markup examples**
@markus send thoughts to Per on how to integrate this @all welcome to help out with element and attribute documentation

**Forms feature**

@Josh more examples

Josh: plan to do entire student workbook; using book profile. Will try to get permission.

James: can we find some government publication, something with a worksheet?

@josh to look for such documents, use genericedocument profile
