### Regrets

Matt

### Previous Telcon

ZedAI_telcon_20090706

### Action Items
New

- Markus contact Marisa about time assignment for periodicals work
- Per book skype date with Markus for Content Selection feature work
- Matt (hopefully) propose whether we need specialized content models for bibliographies and indices (as opposed to section @role="bibliography")

Brought Along

- Markus ask rdf/a task force for alternatives to CURIE syntax
- Markus propose a runninghead element for use in conjunction with section/h
- Markus: add reference/xlink/about to schemas, and raise all issues that arise on list
- Boris: help dissect XLink spec for good subset scope, and raise any issues re XLink 1.0 vs 1.1 (can we express additional constraints in ZedAI spec prose to "emulate" 1.1?)
- Marisa bring Boris's annotation role property suggestions to Request_A_Role
- Markus add all math issues clearly to tracker
- Dennis/Josh contact QTI and ask about replacing the HTML with host language text content set.
- Markus to add spec prose on cascading level for inline styles: "For the purposes of the CSS cascade, these values are considered author-level"
- Markus to create wiki page devoted to level issue

Agenda/Minutes

Current timeline and conflicting projects

Several of this WGs member will remain occupied with the DAISYOnline project for the remainder of August. Thus, we need to expect a reduced speed of ZedAI developments. The Z39.86 committee chair has been informed that DAISYOnline + XHTML2 demise will cause delays.
