4 Action Items
   4.1 New
   4.2 Brought Along
   4.3 Postponed beyond this iteration
5 Agenda/Minutes
   5.1 Linking Proposal - now implemented
   5.2 Major remaining items this iteration
   5.3 Periodicals

Present
Markus (scribe), Josh, Ole, Marisa, Per, Kenny, Boris, Sam, Matt, James

Regrets

Previous Telcon
ZedAI_telcon_20090803

Action Items

New
Markus: start writing the periodicals schema at the 26th of August
Boris: define how to use RDFa to associate an annotation with an annotator (now that rdfa:about is no longer used) - perhaps just use @role?
Markus: describe our use of xlink:simpletype as an implicit default a la docbook5
Markus: update samples to define the z3986 CURIE prefix
James: make sure the spec no longer claims to reserve the z3986-profile and feature values; instead define above rdfa solution
James/Markus: samples and primer etc changes in the spec, relating to linking proposal and link rel="z3986-profile" etc
Markus define the property to use on reference for issue 57 (reference role="object"?)
Markus: close all issues that are fixed by linking proposal
Boris: add issue to tracker re inversing pointing relationship between expansion and abbr
Per: Markus: have Content Selection draft available for review by next concall
Dennis: solve Issue 60 (http://code.google.com/p/zednext/issues/detail?id=60)
Dennis: solve Issue 61 (http://code.google.com/p/zednext/issues/detail?id=61)
Josh: solve Issue 50 (http://code.google.com/p/zednext/issues/detail?id=50)

Brought Along

Markus contact Marisa about time assignment for periodicals work {DONE, Marisa cannot extend her time in this group} 
Per book skype date with Markus for Content Selection feature work {ONGOING}
Markus: add reference/xlink/about to schemas, and raise all issues that arise on list {DONE}
Marisa bring Boris's annotation role property suggestions to Request_A_Role {DONE, on page as well as a couple of things that came out of periodicals}
Markus add all math issues clearly to tracker {DONE, Dennis has the actions}
Dennis/Josh contact QTI and ask about replacing the HTML with host language text content set.
Markus to add spec prose on cascading level for inline styles: "For the purposes of the CSS cascade, these values are considered author-level"
Markus to create wiki page devoted to level issue

Postponed beyond this iteration

Matt (hopefully) propose whether we need specialized content models for bibliographies and indices (as opposed to section @role="bibliography")
Markus ask rdf/a task force for alternatives to CURIE syntax
Dennis: solve Issue 46 (http://code.google.com/p/zednext/issues/detail?id=46)
Markus: deal with term@termdef to be in harmony with @for (see http://code.google.com/p/zednext/issues/detail?id=42)
Markus propose a runninghead element for use in conjunction with section/h

Agenda/Minutes

(Reminder: see ZedAI_telcon_20090803#Priorities_for_this_release)
Linking Proposal - now implemented

- Review ZedAI_Linking_Proposal#Summary_of_changes
- Discussion and distribution of remaining TODOs

Boris: does this replace object?

Markus: No. Not at this point.

Boris: why do we have expansion pointing to abbreviation instead of the other way around? (The same question would apply to @termdef) @boris add issue to tracker

Major remaining items this iteration

- **Specification**
  - "core markup model" concept in the spec (James, Markus)
  - "feature exposed elements" concept in the spec (James, Markus)
- **content selection feature**, first real draft (Per, Markus)
  - @Per contact Markus for a Skype date.
  - Review by this group one week before release
- **MathML feature**
  - Dennis: solve Issue 60 (http://code.google.com/p/zednext/issues/detail?id=60)
  - Dennis: solve Issue 61 (http://code.google.com/p/zednext/issues/detail?id=61)
- **Periodicals feature**
  - Kenny: status? Way forward?
- **Forms feature**
  - Josh: solve Issue 50 (http://code.google.com/p/zednext/issues/detail?id=50)

Periodicals

Kenny: Ole and Sam work on the two produced sample docs, also looking at sibling schemas.

Kenny: We have a huge overlap between this profile and genericdocument and book.

Schema authoring starts after the call at the 26th.
