Discovery services

We work with industry partners to make it easy for authors, readers and librarians to access our content through discovery platforms and full-text indexing.

If your library uses one of the services below, you can be confident that your users are able to successfully search and view the full text of the Emerald content you have access to.

Open Discovery Initiative (ODI) conformance checklist

Y/N/P	Recommendation	Paragrapgh	Comment
Y	Content Provider makes available to Discovery Service Providers core metadata and underlying fulltext/original content for complete offerings	3.2.1.1 (1)	All proprietary Emerald content is available for indexing; some exceptions exist for third-party ebooks and ecases.
Y	Content Provider makes available to Discovery Service Providers, the core set of metadata elements (see 3.2.1.2) for each item submitted for indexing.	3.2.1.1 (2)	
Y	Content Provider provides the content item and additional descriptive content for as much of their content as possible.	3.2.1.1 (3)	

UPDATE COOKIE SETTINGS

Y/N/P	Recommendation	Paragrapgh	Comment
Y	Content Provider provides libraries, on request, with a statement of participation in the discovery services, including disclosure of coverage depth and content depth.	3.2.2	*Central resource coming soon.*
Y	Content Provider's agreements with Discovery Service Providers do not include non-disclosure agreements.	3.2.3	

Y/N/P	Recommendation	Paragrapgh	Comment
Y	The transfer of Content Provider's data to Discovery Service Providers makes use of existing standards where applicable and uses one of the metadata encoding schemes listed in 3.3.3.	3.2.4	Emerald is using JATS for journals and ecases, and a DTD derived from NLM 3.0 for ebooks. MARC records are available for ebooks and ecases. KBART II upgrade for all products is underway (Q2-2017)

Maximise discovery

We recommend some best practices for discovering and using our content
collections in your library.

- Set your collections up in discovery and knowledgebase services

- Add OpenURL and proxy server locations to your institutional account

- Activate Google Scholar library services

- Include eCases and eBooks in your OPACs (via MARC records).
