Shared Electronic Resources Understanding (SERU)

Book Expo America 2008
Judy Luther, President, Informed Strategies
judy.luther@informedstrategies.com

What is SERU?

- **Recommended Practice** that allows libraries and publishers to forego a license agreement and rely on a mutual understanding of widely accepted practices

- Developed by a NISO Working Group of librarians, publishers, subscription agents, lawyers
Why SERU?

- Bilateral agreements don’t scale for the long tail
  - Increased costs for publishers and librarians
  - Prolong sales cycle and delay access by users
  - Processing costs can exceed publication costs
- License agreements as *written* contracts cannot be standardized
- Growing consensus of common practice

Perceptions & Reality

- Perception
  - Librarians required licenses
  - Publishers required licenses
- Reality
  - Librarians often have a backlog of licenses
  - Many publishers don’t have license agreements
  - Growing environment of trust based on amicable resolution of problems
How Was SERU Developed?

2005-2006
- The problem and idea discussed at library meetings
- Publisher & library organizations supported exploration
- Involved legal consultation
- NISO established Working Group – created draft

2007
- Draft vetted with stakeholders
- NISO comment period, pilot

2008
- NISO approves SERU as Recommended Practice
- Promotion period

Perceptions of Risk

Librarians
- Liability
- Loss of content hosted by publisher
- Perpetual access & preservation
- Privacy, performance, promotion, statistics
- Loss of leverage

Publishers
- Content distributed
- Loss of ancillary revenue
- Content accessible to unauthorized users
- Costs of litigation
- Preservation, use of data
Without a License Agreement

Omit Contract Terms
- Jurisdiction
- Warranties
- Liabilities
- Force majeure
- Assignment
- Severability

Use Purchase Order Terms
- What content
- For what price
- For what period
- How many (for whom)

Topics in Shared Understanding

- Subscriptions and subscribers
- Appropriate and inappropriate use
- Confidentiality and privacy
- Online performance and service
- Perpetual rights and archival access
Working Group Discussions

- Use language that represents widely accepted practices
- Language issues rather than permissions
- Created for domestic use
- Document establishes the framework
  FAQ provides examples
- Type of library – mostly academic, government

Expectations for SERU

- SERU cannot
  - Replace or eliminate all license agreements
  - Be a standard license or click through
  - Be customized
  - Work internationally
- SERU can
  - Reduce costs for publishers
  - Streamline sales/acquisitions process
  - Signal libraries that publishers adhere to best practices
How SERU Works

- NISO Registry for publishers & libraries
- Forego license and link to SERU on NISO website
- Purchase Order is acquisitions vehicle
- Orders can be placed through vendors such as serials agents or consortia
- On products and services that librarians and publishers agree to use it

Next Steps

Goal: increase awareness with publishers/librarians

- Postcards in publisher booths at ALA
- Activate SERU listserv for discussion
- Share experiences
- Collect testimonials
- Create document for institutions legal counsel
