Notes from Use Cases Breakout Group
3rd In-Person NISO Altmetrics Meeting
January 23, 2014 – Philadelphia, PA

Group 3: Christine Stohn, Martin fenner, James Wismer, Zhiwu Xie, Camilla MacKay, Sharon Dyas-Correia, Marie McVeigh

meaningful use - how to handle spam/gaming without being too prescriptive about what sources we pick or how to value them.

NISO should build trust and value in the metrics

Scientific societies are a good source of use cases

Tenure and promotion decisions are a use case by research admin at universities, but that’s a hard use case and we’re far away from that at the moment, so we’ll focus on discovery for now. (Christine/martin/William)

Discovery is a major use case

What the absolute numbers are is less important when you’re looking at a discovery application than an assessment application

Trend analysis is a good use case in discovery

Looking at social media networks to identify collaborators

Identifying peer reviewers

Your influence among your peers vs. the broader community
